

Delta SubSea

Single Head Brushing Tool

Delta SubSea's single head brushing tool offers exceptional flexibility when cleaning wellheads in harsh marine environments from 13" to the standard 18-3/4". The tool can be easily outfitted with an optional citric acid pump and reservoir when it's necessary to clean areas with tough scale. A popular feature of DSS's single head brushing tool is it allows you to change the individual brush filament modules saving you the expense of having to swap out an entire brush head when it begins to show signs of wear.

Specifications

Materials:

- ▲ 6061 T-6 Aluminum
- ▲ 316 SS
- ▲ Ampco 45 Ni-Al-Brz
- ▲ Carbon steel (motor)
- ▲ Polypropylene

Hydraulic Requirements:

- ▲ 6 gpm @ 2,000psi

Working Depth:

- ▲ 10,000 FSW
